What to me is measureless.
Half the pain or half the pleasure
Of my love's great tenderness,
I will touch my heart's-strings for a
Since to thee it doth belong—
And the echo shall adore thee
In a song within a song.

As the sun is—to the flowers,
As the stars—to midnight skies,
As the rainbow—to the showers, As the light—to eightless eyes. As the fisme is—to the fire, As the breeze is-to the sea; As the gain—to the desire, So, dear heart, art thou to me!

SAPOLIO is a solid, handsome cake of house-cleaning soap, which has no equal for all scouring purposes except the laundry. To use it is to value it. What will SAPOLIO do? Why, it will clean paint, nake oil-cloths bright, and give the doors, tables and shelves a new appearance. .. will take the grease off the dishes and off the pots and pans. You can scour the knives and forks with it, and make the tin things shine brightly. The wash-basin, the bath-tub, even the greasy kitchen-sink will be as clean as a new pin if you use SAPOLIO. One cake will prove all we say. Be a clever housekeeper and try it. Beware of imitations. There is but one SAPOLIG.

The weather indications this season polut to a winter term much like that of last winter. Cold waves soon soften to mild temperature, with clouds and rain and southerly winds. The average of cold last winter was greater than of some whilers when more severe changes were experienced, and many residents found that they required more cast than usual, a good degree of heat being needed every day, while formerly January and February thawe would lessen the requirements for caloric.

Miss Morrison of Itraintree and Miss Elia Ciark of South Weymouth sang solos. In the dining room adelnty collation was served which came in for a pleasant diversion at the proper time. Later in the evening, when the more staid began to take their leave, the younger portion of the guests started a quadrille in the parlor and it was long before they were willing to say good hye to the dance. The affair was a social success and there was just enough absence of formality to insure the comfort and happiness of sil who were there.

45 WILLIAM STREET, NEW YORK, 2d December, 1889. TO OUR AGENTS:

Geatlemen;—Hy the recent conflagrations at LYNN and BOSTON, I estimate the aggregate loss of this company at \$275,000.

Acting with the promptitude which has been a prominent feature in the practice of this company since its entry into the Udded States 41 years ago, it is likely that the entire sum named will be dishursed within the next fortnight. Already some losses have been adjusted and settled.

To satisfy the claims now under consideration, as well as the ordinary losses of the company to greatly ation of securities will be unecessary, the same always re-

the company, no realization of securities will be necessary, the sums always retained at eall at Hanks and Trust companies for emergencies being far more than adequate to the present demand. The eash held on deposit at this date in New York City alone is \$436,000.

York City alone is \$436,000.

The present seems a favorable opportunity to once more place before your clients the merits of this company.

Long ogo we demonstrated our ability to satisfy (and, as we believe liberally) claiments sorely tried in calamities like that at CHIGAGO in 1871 and ROSTON in 1872; and now, whilst the losses sustained by our Company are comparatively usignillennt, your clients may well, in view of possibilities so clearly brought to brought to their attention by the recent conflagrations, inquire anew as to our resources and constitution. resources and repulation. Yours very truly,

HENRY W. EATON, Resident Manager. Since date of above circular, many of the claims at LYNN and BOSTON have been rettled. In accordance with the invariable practice of the Company, alt tosses are peld as soon as adjusted WiTHOUT DISCOUNT. Fire Loures paid in the U. S. exceed \$16,000,000

Over and ever again,
It every time and tengre,
In every time and tengre,
In every style and strain
Mare the word's old songs been out
times the digh from the seal was stire
lines the heart of a man was broke
Here the notes of despair been heard
And the system of pain been spoken

The norg that you sing today,
Sweet on the printed pages,
Was song in the far away,
In the youth of the worn-out ages;
The charm of your love-born tune,
The genes that your lines uncover,
Were set in some savage tune
By the heart of some pages lover,

The funcion that fill your rhymen,
The visions that hemel your lays,
Are the spectrus of olden times
And the ghests of forgotten days;
Yn players on noise of woo;
Yn dreamers of love and sorrow,
They sang to the years ago
The sound you will sing to-morrow

But what if the rhymes are new, And what if the thoughts are old, if the touch of the chord be true. And the flight of the singer bold. Let them come to us still again. To-morrow and yet hereafter,

TO OUR AGENTS:

TO OUR AGENTS:

Gentlemen:—By the recent conflagrations at LVNN and HOSTON, I estimate the aggregate loss of this company at \$275,000.

Acting with the promptitude which has been a prominent feature in the practice of this company slace its entry into the United States 41 years ago, it is likely that the entire sum numed will be disbursed within the next fortnight. Already some losses have been adjusted and settled.

To satisfy the claims now under consideration, as well as the ordinary losses of the company, no realization of securities will be necessary, the sums always retained at call at Banks and Trust companies for emergencies being far more than adequate to the present demand. The cash held on deposit at this date in New York City alone is \$130,000.

The present seems a favorable opportunity to more more place before your clients the merits of this company.

Long ago we demonstrated our ability to satisfy (and, as we believe liberally) claimants sorely tried in calantities like that at CHICAGO in 1871 and HOSTON in 1872; and now, whilst the lesses sustained by our Company are comparatively insignificant, your clients may well, in view of possibilities so clearly brought to brought to their attention by the revent conflagrations, inquire anew as to our resources and reputation. Yours very truly,

HENRY W. EATON, Reshent Manager.

HENRY W. EATON, Resident Manager. Since dale of above circular, many of the claims at LYNN and BOSTON have been sellled. In accordance with the invariable practice of the Company, all losses are paid as soon as adjusted WiTHOUT DISCOUNT.

Fire Losses pald in the U.S. exceed \$16,000,000.

The announcement that Rev. F. ff. Pal-mer would give a lecture on the tolsecu-habit drew onto large andience last Sun-day evening, which well filled the church ecture-room. In introducing the subject he speaker disclaimed being a prejudiced witness as he had himself used the weed for alline during his college course, and the smell of a freshly burning eigar was agree-alde to him. "Yel I hate the stuff," said he,

"with my whide body, heart and sont, because I know that it is ruining hundreds and shousands of valuable lives. That is not prejudice, it is intelligent judgment founded on years of careful observation." not prefutitee, it is jurcinjona jurgment, funitied to it years of currefut observation."

The lecturer proceeded to prova that tobacco is one of the most active poloons known to science, and to show its injurious effects on the human system, in so doing he read a number of somewhat extended quotations from "Meta Lander's" "Tobacco Problem," the author of which has been at great pains to collect opinious and evidence from the best physicians, lawyers, statesmen, explorers, and other qualified observers, in his econtry and Europe. In this work it is said, "A chemical examination of a tobacco leaf shows its surface deted with minute glands, which contain an oil found in no other plant, the proportion of this oil being seven per cent. of the whole weight of the leaf. This oil is nicotine—one of the subtlest of poisons—that determines the strength of the tobacco. Physicians who have studied its effects thus som them up: Nicotine primarily lowers the circulation, quickens the respiration, and excites the muscular system; but its ultimate effect is general exhaustion. As administered in even the minutest doses the results are slamming, and in a larger quantity will occasion a man's death in from two to five minutes. A prominent tobacco mandracturer declares that notting ever goes into lobacco so deleterious to the constitution as tobacco itself. That its legitimate results are not invariably manifested is owing to the marvellous power oil he human system to lolerate

That its legitimate results are feet invariably manifested is owing to the marvellous power of the human system to loterate poison taken gradually. It is with tobacco as with landanum, opium, arsenic, whisky and other liquors to the use of which a man may, by degrees, habiturate himself, so that he can take it with seeming impunity yel it is none the less a poison, slowly in may be, but surely Impairing the organism and Inducing diseases which strike at the life forces. The tendency of tofacco to create a desire for alcohni was bouched upon, and some facts were given illustrative of the disgusting and unlealtiful practices engaged in the manufacture of various forms of the weed, especially of cigareltes. Dul of six humbred in the State Prison, at Auburn, N. Y., sent therefor crines committed through strong drink, five hundred leatified that it was tobacco which led liner to intemperance." Mr. Palmer referred to the financial aspect of the case, and hold his audience that the sunt saved by his own giving up of tobacco years ago in his college days, represented the value of his entire library and household furniture, with something in the way of a bank account thrown his and that a little pleasure, of a low and animal sort, is obtained from it. There are two reasons why you dant give it mp; one is that you are delibetately making the fool's bargain of huying a little animal pleasure at the price of your bodily, and mental and spinitual health, and the other is that it is your master. You can't give it up; one is that you are delibetately making the personal opinions and practice of a number of representative chergymen on this subject. Two tobacco is sers with whom Mr. Palmer had talked had read this article and had received the unpression that a large majority of these clergymen had promounced in its fact. By actual count, how-

alked liad read this article and had received the impression that a large majority of liese clergymen had pronounced in lis favor. By actual count, however, that fifteen laid spoken against it and only four for it, while six were doubtful. This shower, the speaker claimed, the influence of the habit in biasing the mind.

One clergyman, himself an inveterata user of the weed, had, some years ago, answered a letter of inquiry as follows; "Wheller men and women drink tea and coffee, or smoke is a matter that does not interest me in the least. I don't find those topics in the Scriptures, and I have enough to do in my legitimate work of trying to bring men to a saving knowledge of the truth as it is in Jesus, without fooling away my time in the discussion in fusiters indifferent." This man alone, out of fifty-five similately addressed, had since passed away from earth, a victim, as many of his friends believe, to the tobacco labit, his fine powers and his work for Christ being sacriliced to that which seemed to fitus with the

A Singular Discovery.

A 'singular discovery has been made on the F.ii Islands. A disease had caused much havoc on a banana pinotaion, part of which was on a flat neur the scashore. The sea swept into this ection, remaining about an hour. All the plants were killed as far as the standing stems were concerned, but vigprous young shoots came up freely from the roots, and were not only quite free from disease, hat soon begne to bea much larger imnches of fruit than the older plants ever did. The planter ook the blut and experimented upon number of budly diseased plants which he sea had not reached. They cut lown the plants, nod, having stirred the ground about them, poured from one to four buckets of sen water over each. The result was that, while the parent stems withered, vigorous young shoots came freely away without a sign shoots came freely away without a sign which you can obtain the right to in ench. COMPARE WITH IT. Crime and the weather.

An old eriminal lawyer says that coidhiooded erimes are planned and axeculed
in the winter. In the summer crimes
are the result of impulse. Most of them
occur in the open air, and are the result
of accidental contact. This is worth
knowing. In the aummer the timid etigen should keep his eyes open. The
same advice holds good for the winter.—

45 WILLIAM STREET, NEW YORK, 2d Hecember, 1889. For OCE, AGENTS:

Gentlemen:—By the recent conflagrations at LYNN and HOSTON, I estimate the aggregate loss of this company at \$275,000.

Acting with the promptitude which has been a prominent feature in the practice of this company since its entry into the United States 41 years ago, it is likely that the rutire sum orange will be disbursed within the next formight. Aiready some loss is larve been adjusted and settled.

To satisfy the chains now under consideration, as well as the ordinary losses of the commany, no realization of scenarios.

To satisfy the claims now under consideration, as well as the ordinary losses of the company, no realization of scenities will be meressary, the sums always retained at call at Hanks and Trust companies for emergencies being far more than adequate to the present demand. The cash held on deposit at this date in New York City alone is \$426,000.

The present scents a favorable opportunity to once more place before your tients the merits of this company.

Lang also we demonstrated our ability to satisfy (and, as we believe liberally) claimants sorely filed in calculate like that at CHICAGO in 1871 and BOSTON in 1872; and now, whilst the losses sustained by our Company are comparatively insignificant, your clients may well, in view of possibilities so clearly brought to brought to their uttention by the recent conflagrations, inquire mow as to our resources and reputation. Yours very truly.

HENRY W. EATTEN Resident Manager

HENRY W. EATON, Resident Manager. Since dale of above circular, many of the claims at LYNN and BOSTON have been settled. In accordance with the invariable practice of the Company, all losses are paid as soon as adjusted WITHOUT DISCOUNT. Fire Losses pald in the U.S. exceed \$16,000,000.

Dear honored falher, kind and true, Let us a while the past review—
Full four-score years their tale halt told, and yet thou art not very old;
For time halt lightly touched thy brow, And scarcely left its traces now.

We'll gently draw the curtain back, And, glancing down its many track Behold the just in manhood's prime, in life's unclouded summer-time;
A dear companion by thy side,
Then on through flowery fields we stray, With scarce a thorn along the way—
When, lot a lengthing, merry band
Are grouped around on either hand, Just brimming n'er with childhood's joys Are nine bright, merry tis and boys. Years speed apace—their flecting wing Joth to sil sal changts bring.
Our angel mother, nardian, solde, Ilath crossed the waters dark and wide; Ilet voice halt joined the heavenly choir, And fingers touched the golden lyre. Bereaveil and wondeds, honored sire, Thy greef hath chastened each desire, And, bowing healt ble passing rod, Ilath drawn thee nearer to thy Good.

And, bowing 'neath the passing rad, Ilaih drawn the marter to thy God. The sons and daughters gathered here To explosize this glad new year, Westell words of brediction bring And songs of joy and gladness sing. A Women's Discovers.

There's a great difference in lamp-chimneys - depends on the glass. One pops whenever anything happens, some-times when nothing happens. Another almost never breaks.

Another almost never breaks.

Lamp-chimneys are like segars—they cost so little apiece and so much by the year!—the breaking kind.
The other sort is like the massles—once is enough.

Turkeys Can you tell them apart?

Dyak purents sro very fond of their children, and are brave to the doath in their defence. I was told of a Dynk father who, on seeing his little hos seized by n erocodile at the water's seed to make the sides. (This is, by the way, a very commun delusion nument the bald. They seem to imagine that they cao conceal their baldness by assembling a few dozen hairs from the surrounding country, as it were, and forcing them over the hald acalp in streaka which only emphasize the haldness.)

Well, as this gentleman was at work which only emphasize the hald spot in tha way, his little girl, some four years old, looked up with wide open eyes, end asked:
